

THE LIGHTING BIBLE® 14

DELTA LIGHT®

WELCOME

TO OUR WORLD.

THINGS TO SEE.

**CUSTOMISE
YOUR SUPERLOOP PLUS**
Meet the newest member of our Superloop collection. Superloop Plus features an integrated decorative panel, for you to customise. Our proposed options are light and dark grey felt in recycled PET. However, you can tailor the panel to the design of your project, in felt, leather, wood, textiles and more. Discover the unlimited possibilities.

**MULTINOVA,,
MULTI-APPLICABLE**
Multinova has something familiar and something fresh at the same time. As a disc of light, Nova refers to the Supernova range, as both families share similarities in looks and ways of installation. But Multinova is slimmer and has some additional features to make it multi-applicable, hence Multi in the name.

**HALOSCAN,
DESIGN FOLLOWS OPTICS**
Designed around its flat optics, Haloscan combines ultra-minimalistic looks with a pleasurable light effect. With its different finishing colours, multiple beam angles and various installation options, Haloscan is perfect for creative compositions throughout an entire project.

**ARTUUR,
SOPHISTICATED DETAILS**
Everything about Artuur catches the eye, be it its design, its optical compartment or its small protrusion when installed into the ceiling. Artuur adds depth into the room owing to its gentle protruding ring. Small enough to be noticed, big enough to make a difference.

SOLISCAPE
An extremely versatile and flexible system, specifically designed to create human-centric environments. Developed together with **UNStudio**, Soliscape combines lighting, acoustics and IOT into an aesthetically appealing solution. Soliscape presents a toolbox with flexible components to architects and designers, to create unique constellations in human-centric environments.

ZOOVER, GENTLE TEXTURES
Zoover adds volume, depth and texture to the room. Designed as a shallow dome, Zoover has different looks depending on the point of view. Looking at it from aside, the thermoformed shell has a very neutral appearance. Only when lowering the viewpoint, more and more details catch the eye: a performant light grazing the inner dome.

A NEW TAKE ON SPY
In our continuous search for better user comfort with more precise optics and better light control, the complete Spy range has been upgraded. The result? Fresh shapes and additional finishing colours, better light comfort through hybrid optics, improved LED colour consistency and new perspectives with Tunable White and Soft Dim.

NEXT GENERATION
This Bible is not only filled with novelties, some longstanding Delta Light classics got upgraded too. Fresh designs, a more modern look, better CRI, new or improved optics, ... ready to shine on in the coming years. Have a look at the redesigned Kix, our upgraded Spy family, Minigrid and Deep Ringo extensions, the rebirth of Backspace and Walker, and more.

VISUAL COMFORT FOR OFFICES

The Lighting Bible 14 offers a whopping new array of technical architectural office lighting. Each with its own set of technological advantages and unique design language. While Inform focuses on Melanopic Light Technology (MLT), Conform by Dean Skira is equipped with Natural Light Technology (NLT). Both technologies are developed in-house and are focused on human wellbeing, to boost and support the human circadian rhythm.

LIGHT QUALITY OUTDOOR

Delta Light's team of engineers and optic experts is on a continuous quest to match the company's credo for design with an optimal quality of light. With the new Frax we have taken our fascination for the perfect beam outside. Clean-cut light distribution to boost your outdoor experience. Outline and Skov perfectly shield the light, offering an unobtrusive solution to guide you the way.

CONNECTED SURFACES

First introduced in 2003, Connect was based on 2 fluorescent tubes facing opposite directions to graze light on 2 right-angled surfaces. Today, Connect balances on the edge between wall and ceiling or wall and wall, as you like.

INIVISBLE YET TANGIBLE

Impressed by his extensive expertise and passion during the design of the Polesano, we decided to go on our next adventure with lighting designer Dean Skira. Together with Dean we take you on a journey to the ultimate minimalism, introducing Nime.

REFLECTIONS

A new set of experiences has joined our decorative Reflections range. The playful pendant lamp Mantello challenges the classic shape of a lamp shade, playing with dimensions and textures. While the aluminium edition is opaque with a matte finish, its counterpart is transparent and glossy, crafted from mouth blown glass.

The pendant lamp Still is created by the Belgian designer Nathalie Dewez. The lamp plays with balance and movement. With its light source off centre from its point of suspension, it creates an ever-changing elegant dynamic. Poetic and playful, Still truly represents the spirit of Reflections.

STRETCH CEILINGS

Our collection of luminaires offers a wide range of lighting possibilities and styles for stretch ceilings, from surface-mounted to recessed luminaires - and even recessed magnetic profiles. New in The Lighting Bible 14 is a range of mounting kits to be used for our trimless luminaires, an easy trimless installation into stretch ceilings!

5 YEAR WARRANTY

At Delta Light we have full confidence in the quality of our products. All of our products are designed and manufactured according to the highest standards, using nothing but the best parts and technology. As a proof of our commitment we offer a 5-year LED warranty, starting as from the date of delivery of the product to the authorised distributor of Delta Light NV. Read about the details and conditions on the Delta Light website.

TECHNOLOGY EMBRACED

Color consistency has always been a point of attention within the Delta Light product range. Up till now we have been using SDCM 2 - the best available – but in this Lighting Bible we introduce COB LEDs with SDCM 1, together with COB LEDs in Tunable White or Soft Dim. Lots of new solutions within both existing and new families.

New installation facilities are available in our exterior products by offering 24V-DC solutions. Beloved families like Kix and Logic now come with a 24V-DC convertor included, making it possible to put a save 24V-DC line throughout the garden and connect the luminaires in parallel.

DALI is one of the most frequently used dimming systems for projects no matter what scale. As leading company in lighting and member of DiiA, we embrace new technologies and a transition to DALI-2 is a logical next step. As such, all DALI dimmable luminaires and remote drivers in this edition of the Lighting Bible are DALI-2 compliant.

Last in line is the new design of the suspension and connection components. To keep the focus on the luminaire instead of its suspension we introduce a nearly invisible suspension with Small Trim (ST), next to the existing trimless suspension sets. A quick and easy way for a neat suspended light setting.

NIME

Design by **DEAN SKIRA** & Delta Light

'The absence in its presence,
the presence in its absence.'

ARTUUR

'Artuur adds depth into the room owing to its gentle protruding ring. Small enough to be noticed, big enough to make a difference.'
